

Veeam Products *At-a-Glance*

Veeam product	Business value to the end user	Features/Functions	Benefits
Veeam® Backup & Replication™ Modern Data Protection Built for Virtualization™ for VMware vSphere and Microsoft Hyper-V	<p>Powerful: Best RPO/RTO, enterprise scalability, multi-hypervisor support</p> <p>Easy-to-Use: No agents, built for virtualization, 100% reliable</p> <p>Affordable: Less operational effort, reduced storage, lowest TCO</p>	<ul style="list-style-type: none"> • vPower™: Patented Veeam® technology that runs a VM directly from a compressed, deduplicated backup file on regular backup storage. • Fast, efficient backup: Built-in deduplication, “forever incremental,” changed block tracking, agentless. • Fast, flexible recovery: Image-based backup enables faster and more reliable VM recovery, while Instant File-Level Recovery and U-AIR (Universal Application-Item Recovery) can quickly recover individual files and application objects. • 2-in-1 backup and replication: Replicate on-site for high availability, off-site for disaster recovery; includes failover and failback. • Cloud Edition: Turns every leading public storage cloud into an easy-to-use data repository for your VMware and Hyper-V backups. 	<ul style="list-style-type: none"> • Recover a VM in 2 minutes or less. • 50x faster offsite backups with Built-in WAN Acceleration • Eliminates the need for extra backups; quick recovery from everyday disasters. • Near-continuous data protection for any virtualized application.
Veeam Backup Essentials Modern Data Protection for small businesses	<p>#1 VM Backup, especially packaged and priced to offer savings of 33% or more to small businesses with typically fewer than 200 employees and VMware or Hyper-V environments with 2, 4 or 6 sockets</p>	<p>All the features and capabilities of Veeam Backup & Replication</p>	<ul style="list-style-type: none"> • Fast, reliable backup, recovery and replication
Veeam Backup Management Suite Modern Data Protection with advanced capabilities for VMware and Hyper-V environments of all sizes	<p>#1 VM backup, with advanced capabilities to easily:</p> <ul style="list-style-type: none"> • Identify unprotected VMs • Optimize backup resources • Automatically document backup status • Monitor the backup infrastructure 24x7 	<p>All the features and capabilities of Veeam Backup & Replication</p> <ul style="list-style-type: none"> • PLUS Advanced monitoring, reporting and capacity planning for backup and virtual infrastructures 	<ul style="list-style-type: none"> • Fast, reliable backup, recovery and replication • Complete visibility of the backup and virtual infrastructures
Veeam Management Pack™ for VMware Leverage your investment in Microsoft System Center to manage VMware	<p>Mitigate risk: Solve problems faster and never miss another SLA with proactive VMware monitoring.</p> <p>Increase efficiency: Streamline activities in the datacenter and drive IT efficiencies with System Center.</p> <p>Leverage existing investments: Eliminate non-integrated point solutions and use System Center to monitor VMware</p>	<ul style="list-style-type: none"> • Monitoring/reporting for Veeam Backup & Replication: Monitors status of backup jobs and reports on protected/unprotected VMs • Deep VMware visibility: Drill down in topology views from app-to-metal, including the virtualization layer • Enhanced fault-tolerance: Eliminates single points of failure • Capacity Planning Reports for VMware: Forecast, model and plan for growth in your virtual infrastructure 	<ul style="list-style-type: none"> • Leverages existing investment in Microsoft System Center to provide deep visibility of the Veeam backup infrastructure • Mitigates risk of outages by mapping dependencies to critical business applications • Avoids risk of data interruption if vCenter fails • Enables proactive IT management and increases datacenter efficiencies
Veeam Smart Plug-in™ for VMware Deep VMware monitoring with HP Operations Manager	<p>Cost savings: Eliminate the cost of additional monitoring frameworks and the need for specialized VMware training.</p> <p>Risk reduction: Avoid downtime and keep critical applications running.</p>	<ul style="list-style-type: none"> • Hundreds of out-of-the-box vSphere metrics and events.. • Automatic failover and load balancing. • Built-in VMware knowledge base. 	<ul style="list-style-type: none"> • Deep VMware visibility in Operations Manager. • High availability to manage and monitor your most important VMware workloads. • Solve identified problems faster with integrated VMware with your VMware “expert in a box.”
